

SABIS®

LET'S READ

The SABIS® *Let's Read* aims to encourage students and get them excited to read inside and outside the curriculum, about various topics, and in many languages.

Benefits of reading:

Improve their fluency in native and foreign languages

Improve readers' comprehension of texts

Develop their vocabulary

Expose them to cultural and historical events

Improve their concentration and memory

Develop their critical and analytical thinking skills

Develop their visual imagination

Improve their writing skills

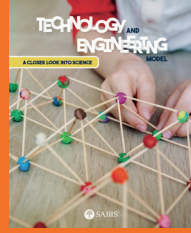

Let's Read will extend over the academic year: it will start with a general reading campaign covering all subjects, then will move into subject-specific campaigns throughout the year. Different activities will be planned, and visual aids will be provided.

The general campaign will include the SABIS® core reading program and focus on extra-curricular/independent reading (SABIS® and other publications.)

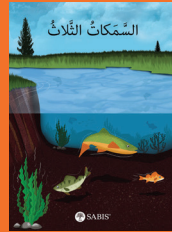

It will then move into subject-specific focus campaigns.

October: Science

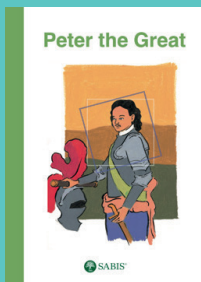

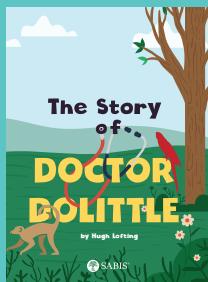

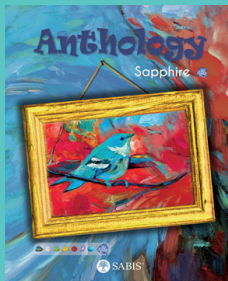

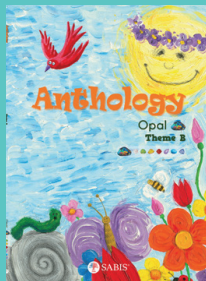

January: Arabic
